The studies on average say we spend 70-80% of our waking hours in some form of communication. If you are a quick thinker and an agile talker, the burden is on you to relax your pace for the slower, more thoughtful communicator—or for the guy who has trouble expressing himself. This kind of listener may be receptive for only a brief amount of time and may become rude or even hostile if the speaker expects a longer focus of attention. 4. Listening Apprehension This is the fear that you might be unable to understand the message or process the information correctly or be able to adapt your thinking to include the new information coherently. Eye Contact - it is normal and usually encouraging for the listener to look at the speaker. In the workplace, they are the first ones to spot flaws and come up with suggestions for improvements. Fortnite Fortnite is arguably the most popular of the Battle Royale games to hit the tech world in quite some time. Your ability to listen effectively depends on the degree to which you perceive and understand these messages. Explore Courses Examples of active listening Here are some examples of statements and questions used with active listening: Paraphrasing - "So, you want us to build the new school in the style of the old one?" Brief verbal affirmation - "I appreciate the time you've taken to speak to me" Asking open-ended questions - "I understand you aren't happy with your new car. You make a conscious effort to hear and understand the complete message being spoken, rather than just passively hearing the message of the speaker. But rather than interrupt, wait until the speaker pauses. Content-oriented listeners want to listen to well-developed information with solid explanations. Everyone has biases but good listeners hold them in check while listening. The more an individual can get information out of the meetings, the instructions, and reports provided to him, the more efficient and successful they will be at completing the task. Clarification usually involves the use of open questions which enables the speaker to expand on certain points as necessary. By asking relevant questions the listener also helps to reinforce that they have an interest in what the speaker has been saying. Questioning - the listener can demonstrate that they have been paying attention by asking relevant questions and/or making statements that build or help to clarify what the speaker has said. League of Legends League of Legends is one of the most highly played multiplayer online battle arena (MOBA) games available for the PC. You can also summarise the conversation to make sure you understand all the person is trying to say – this works well at networking events at the end of conversations, it also gives you an excuse to move onto another conversation. Listening is the most fundamental component of communication skills. When face to face with a person, you can detect enthusiasm, boredom, or irritation very quickly in the expression around the eyes, the set of the mouth, the slope of the shoulders. Remembering details, ideas and concepts from previous conversations proves that attention was kept and is likely to encourage the speaker to continue. They can sense that you will not be jumping to conclusions based on superficial details. Don't expect to master the complexities of this game overnight, but the action starts as soon as you click the "play" button. Here are some key barriers: 1. Photo Courtesy: @FortniteGame/Twitter Even if you aren't playing with friends, it's easy to find a match to join, and the game is highly addictive. It can help to reinforce that what is being said has been understood. Of that time, we spend about 9 percent writing, 16 percent reading, 30 percent speaking, and 45 percent listening. In this article, we'll cover the following: Why is listening important? It takes energy and concentration. Posture - can tell a lot about the sender and receiver in interpersonal interactions. Saves time and money - Effective listening not only reduces risks of misunderstanding and mistakes that could be very damaging to the business, but it also saves time and money by avoiding starting a task or a project over again, just because the directives given were misunderstood. Notice people speaking - A meeting facilitator encouraging a quiet team member to share their views about a project. They also realise that you care enough about them to listen attentively. The game dumps you into a world with 99 other players, where you engage in a free-for-all battle until only a single player is left standing. Active listening involves giving the other person time to explore their thoughts and feelings, they should be given adequate time for that. Other signs of active listening may include a slight slant of the head or resting the head on one hand. It's helpful to be aware of these factors so that they interfere as little as possible with understanding the message. The game also continues to make an effort to perfect the fan-favorite Master League mode. Fifty percent? This is not an easy thing to do. However, these signs may not be appropriate in all situations and across all cultures. To learn more about listening styles, read The Importance of Listening - Listening Styles Fast-track your career with award-winning courses and practice. Remember that the speaker is using language to represent the thoughts and feelings inside her brain. Attention Span A person can only maintain focused attention for a finite length of time. Employees do not waste precious time and a specific budget allocated to a project. Don't interrupt or cut them off Children used to be taught that it's rude to interrupt. Photo Courtesy: @Brawlhalla/Twitter Smite Smite is another popular MOBA, this one with its champions being gods from ancient pantheons and classic myths. They listen to the message in order to learn how the speaker thinks and how they feel about their message. We get a great deal of information about each other without saying a word. Put aside papers, books, the phone and other distractions. Distraction - the active listener will not be distracted and therefore will refrain from fidgeting, looking at a clock or watch, doodling, playing with their hair or picking their fingernails.

The fun of gaming gets even better when you can play for free on your PC. Fast-track your career with award-winning courses and practice. Try something like, "Back up a second. Finally, don't be distracted by your own thoughts, or biases. What changes can we make to it?" Asking questions - "How many employees did you take on last year?" Mentioning similar situations - "I was in a similar situation after my previous company made me redundant." Summarise questions - A job candidate who summarises their understanding of an unclear question during an interview. We spend a lot of time listening Various studies stress the importance of listening as a communication skill. 3. In addition, try not to focus on the speaker's accent or speech mannerisms to the point where they become distractions. As a result, it requires motivation and effort. But it is a generous and helpful thing to do, and it facilitates communication like nothing else does. Try to feel what the speaker is feeling Empathy is the heart and soul of good listening. League of Legends uses a freemium model where characters rotate weekly, and certain extras cost money. By being there for them, you give them the freedom to express their feelings. Photo Courtesy: @officialpes/Twitter The "Lite" version of Pro Evolution Soccer is free and gives players access to the Online myClub and PES Matchday Mode in addition to playing in Local and Co-op Matches and honing their skills in Training Mode. Effective listeners make sure to let others know that they have been heard, and encourage them to share their thoughts and feelings fully. When listening, remember that words convey only a fraction of the message. Active listening course with online practice Summarise the conversation exercise For a week, try concluding every conversation in which information is exchanged with a summary. hearing Hearing is an accidental and automatic brain response to sound that requires no effort. It's sometimes difficult for an action-oriented speaker to listen through the descriptions, evidence, and explanations with which a speaker builds his or her case. There are many kinds of noise, the four you are most likely to encounter in public speaking situations are: physical noise, psychological noise, physiological noise, and semantic noise. There are some simple steps you can take to let the speaker know you are actively listening, such as asking relevant questions, positive body language, nodding and maintaining eye contact. Active listening skills can help build relationships, solve problems, ensure understanding and avoid conflict. The attentive listener tends to lean slightly forward or sideways whilst sitting. Look at them, even if they don't look at you. Receiver Biases Good listening involves keeping an open mind and withholding judgment until the speaker has completed the message. The game does provide opportunities to earn game currency as you play, which you can then use to purchase champions. For example, we are accustomed to the sounds of cars, construction workers and so on. Increases competence and knowledge - Great listening skills make an employee more competent and capable, regardless of their position. Like League of Legends, Brawlhalla engages in a weekly rotation of playable characters, but you can always purchase your favorites using in-game currency you collect as you play. Interrupting sends a variety of messages: I'm more important than you are What I have to say is more interesting I don't care what you think I don't have time for your opinion We all think and speak at different rates. Listening vs. Benefits of active listening What makes a good listener? In this game, you must coordinate with your teammates to destroy the opposing team's base. If what she says alarms you, go ahead and feel alarmed, but don't say to yourself, "Well, that was a stupid move." As soon as you indulge in judgmental bemusements, you've compromised your effectiveness as a listener. Makes you approachable - As you present yourself as a patient listener, people feel more naturally inclined to communicate with you. Listening means paying attention not only to the story, but how it is told, the use of language and voice, and how the other person uses his or her body. Time-oriented listeners can become impatient with slow delivery or lengthy explanations. Content Content-oriented listeners are interested in the message itself, whether it makes sense, what it means, and whether it's accurate. Benefits of active listening There are many important benefits of active listening, these include: Builds deep trust - As you cultivate the habit of listening sincerely, you invite people to open up. Conversely, biased listening is characterized by jumping to conclusions; the biased listener believes, "I don't need to listen because I already know this." Receiver biases can refer to two things: biases with reference to the speaker and preconceived ideas and opinions about the topic or message. Listening is not something that just happens, listening is an active process in which a conscious decision is made to listen to and understand the messages of the speaker. Helps detect and solve problems - As a leader, they should always be attentive to what employees have to say. We hear those sounds and, unless we have a reason to do otherwise, we learn to ignore them. For instance, when people-oriented listeners listen to an interview with a famous musician, they are likely to be more curious about the musician as an individual than about music. For example, when you're a passenger on an airplane, a flight attendant delivers a brief safety briefing. Genuine, attentive listening has become rare. Clarification - this involves asking questions of the speaker to ensure that the correct message has been received. Noise Noise is one of the biggest factors to interfere with listening; it can be defined as anything that interferes with your ability to attend to and understand a message. You fight in competitions with up to four players, and the ultimate goal is to knock your opponent out of the arena to score points. 2. Listening is: Focused Voluntary Intentional Verbal and non-verbal signs of active listening skills It's a horrible feeling talking to someone and realising that they are not really listening. Shyness, uncertainty or other emotions, along with cultural taboos, can inhibit eye contact in some people under some circumstances. Some teams and stadiums are only available with the paid version of the game, but fan favorites like FC Barcelona and Manchester United are included. Well, one of the best parts about the game is that you can play with your friends — regardless of which platform they have, PC or gaming console — so get ready for some "friendly" backstabbing. Each character has its own set of weapons to use during a match. Combined with nods of the head, smiles can be powerful in affirming that messages are being listened to and understood. Does the speaker want votes, donations, volunteers, or something else? Sometimes we work our way back to the original topic, but very often we don't. Photo Courtesy: @LeagueOfLegends/Twitter The game rewards careful tactics and good teamwork and is always free to play, but if you want to keep your character after a week or add any special features and enhancements to your game play, you will have to pay a fee. Studies also confirm that most of us are poor and inefficient listeners. Tips to become an effective listener and improve active listening skills Tips to help you develop effective listening skills. Good listeners actively endeavour to understand what others are really trying to say, regardless of how unclear the messages might be. Combine eye contact with smiles and other non-verbal messages to encourage the speaker. Give the speaker regular feedback Show that you understand where the speaker is coming from by reflecting the speaker's feelings. But as you gradually get better and better at listening, an automatic benefit is that you develop patience. If you're worried about what a gaming hobby could do to your tight budget right now, we've got you covered. Barriers to effective listening Everyone has difficulty staying completely focused during a lengthy presentation or conversation, or even relatively brief messages. Be attentive and relaxed Give the speaker your undivided attention, and acknowledge the message. Smite also features a rotating roster of free characters that can be permanently purchased with in-game currency or bought in packs with real cash. In conversations that result in agreements about future activities, summarising will ensure accurate follow-through. The way you understand life from your beliefs and thinking is only one way to look at it - listening to other people's perspectives allows you to look at life from different perspectives, some of which you may not have thought of before. When it comes to escaping the real world and killing a little time, it's hard to beat the magic of some PC gaming. Photo Courtesy: @SMITEGame/Twitter Pro Evolution Soccer 2018 Lite Pro Evolution Soccer (PES) is one of the bestselling video game franchises of all-time around the world. These are clues you can't ignore. Most of us are not very good at listening, research suggests that we remember less than 50% of what we hear in a conversation. If the speaker's feelings are hidden or unclear, then occasionally paraphrase the content of the message. By becoming a better listener, you'll improve your workplace productivity, as well as your ability to lead a team, persuade and negotiate. Remembering - try to remember a few key points, such as the name of the speaker. Screenrant gave this fighting game a "Very Good" rating. Brawlhalla The "brawl" in Brawlhalla pretty much says it all for this fighting game that is similar to the popular Super Smash Bros. by Nintendo. Many people argued that modern audiences have lost the ability to sustain attention to a message. Patience to let the other person express his or her feelings and thoughts honestly while you don't judge. By providing this feedback the person speaking will usually feel more at ease and communicates more easily, openly and honestly. Verbal and non-verbal signs of active listening Four different listening styles Examples of active listening Barriers to effective listening Tips to becoming an effective listener Listening exercises Why is listening important? Whether or not these concerns are well founded, you have probably noticed that even when your attention is glued to something in which you are deeply interested, every now and then you pause to do something else, such as getting a drink. An action-oriented listener finds buckling up a more compelling message than a message about the underlying reasons. To experience empathy, you have to put yourself in the other person's place and allow yourself to feel what it is like to be her at that moment. Broadens your perspective - Your own perspective in life is not the complete truth or how everyone else sees it. Photo Courtesy: eclipse images/E+/Getty Images With the world still dramatically slowed down due to the global novel coronavirus pandemic, many people are still confined to their homes and searching for ways to fill all their unexpected free time. Action or task oriented Action-oriented listeners are primarily interested in finding out what the speaker wants. I'm not sure that message is getting across anymore. In other words, it means being aware of both verbal and non-verbal messages. PC Gamer rated Smite an 86 out of 100, with particularly high marks for its arena combat. Summarise group conversations - A manager summarizing what has been said at a meeting and checking with the others that it is correct. Four different listening styles If listening were easy, and if all people went about it in the same way, the task for a public speaker would be much easier. We are surrounded by sounds most of the time. Do your conversational partners the courtesy of turning to face them. In order to be attentive, you'll: Maintain eye-contact with the speaker Direct yourself towards the speaker Pay attention to what's being said Put aside distracting thoughts Mentally screen out distractions, like background activity and noise. Occasional words and phrases, such as: 'very good', 'yes' or 'indeed' will indicate that you are paying attention. MORE FROM QUESTIONSANSWERED.NET In today's world of high tech and high stress, communication is more important than ever, however we spend less and less time really listening to each other. To read these listening tips in more detail, visit 10 Steps To Effective Listening Listening skills exercises Online exercises Practice your listening skills with interactive exercises. If gathering resources, building structures and shooting at your enemies is what you look for in a game, Fortnite is the game for you. Matches take place between five-person teams that focus on destroying their opponents' bases and towers. Each year, new editions don't necessarily offer many new features versus previous years, but they do tend to introduce gaming improvements like better dribbling and player responsiveness. Ask questions to clarify what they are saying When you don't understand something, of course you should ask the speaker to explain it to you. 1. Or just nod and show your understanding through appropriate facial expressions and an occasional well-timed "uh huh." Pay attention to non-verbal cues The majority of face-to-face communication is non-verbal. Listening to colleagues will help you understand what needs to be changed and worked on to retain talent and make improvements. Think that sounds bloodthirsty? Recognise that non-verbal communication is very powerful. Smile - small smiles can be used to show that the listener is paying attention to what is being said or as a way of agreeing or being happy about the messages being received. Non-verbal signs of active listening The people are listening are likely to display at least some of these signs. Listening involves not only the effort to decode verbal messages, but also to interpret non-verbal cues such as facial expressions and physical posture. How much of the person's divided attention you are actually getting? In most Western cultures, eye contact is considered a basic ingredient of effective communication. Let's take a look at a few of the top-rated free PC games, according to Tech Radar and PC Magazine, across a range of genres. You also need to show to the person speaking that you're listening through non-verbal cues, such as maintaining eye contact, nodding your head and smiling, agreeing by saying 'Yes'. Verbal Signs of active listening Positive Reinforcement - this can be a strong signal of attentiveness, however too much use can be annoying for the speaker. The game is played from a third-person perspective, making combat feel much more dynamic. Listen without jumping to conclusions and don't interrupt to finish their sentences. Explore Courses What makes a good listener? Time People using a time-oriented listening style prefer a message that gets to the point quickly. You don't know what those thoughts and feelings are and the only way you'll find out is by listening. People oriented The people-oriented listener is interested in the speaker. Eye contact can however be intimidating, especially for more shy speakers - gauge how much eye contact is appropriate for any given situation. In some situations, you might worry that the information presented will be too complex for you to understand fully. While building trust takes time, it leads to great benefits such as lifelong friendships and a promise of help in difficult times. Active listening definition Active listening requires the listener to fully concentrate, understand, respond and then remember what is being said. The flight attendant says only to buckle up so we can leave. Listening, at its best, is active, focused, concentrated attention for the purpose of understanding the meanings expressed by a speaker. Strengthens your patience - The ability to be a good listener takes time and you need to develop it with regular efforts over time. Active listening is also about patience, listeners should not interrupt with questions or comments. Keep an open mind Listen without judging the other person or mentally criticizing the things she tells you. I didn't understand what you just said about..." Ask questions and summarise to ensure understanding When the person speaking has finished talking, ask questions relevant to what they are saying - try not to lead people in directions that have nothing to do with where they thought they were going. Certainly the opposite is being modelled on the majority of talk shows and reality programs, where loud, aggressive, in-your-face behaviour is condoned, if not encouraged. Hearing is: Accidental Involuntary Effortless Listening, on the other hand, is purposeful and focused rather than accidental. When we talk, we look each other in the eye. Five percent? Some of the factors that interfere with good listening might exist beyond our control, but others are manageable. Listening also builds knowledge and helps fulfil work requirements through progressive learning. Face the speaker and maintain eye contact Talking to someone while they scan the room, study a computer screen, or gaze out the window is like trying to hit a moving target.
